

# AI ENGINEER INTERNSHIP

Accelerate delivery of enterprise AI use cases by selecting appropriate foundation models suitable for the use case, preparing and fine-tuning data and models, deploying production-grade RAG/RAFT architectures, and operating agentic AI systems on the Microsoft Azure, MaiStorage platform and OpenSource stack.

## BENEFITS

- Competitive allowance and benefits package.
- Industry-recognized training & certifications
- Career mentorship from industry experts
- Networking opportunities with IT professionals
- Hands-on exposure to projects, tools, and client environments
- Medical & Hospitalization Coverage
- EPF & SOCSO Contributions
- Leave Entitlements

## QUALIFICATIONS

- AI-First mindset with strong interest in enterprise AI solutions.
- Understanding of model selection including accuracy, latency, licensing & deployment considerations.
- Skills in data curation – labeling, governance, versioning, and evaluating datasets for fine-tuning.
- Proficiency in Linux/Ubuntu for packaging, automation, and operational tasks.
- Knowledge of RAG/RAFT concepts such as vector search, retrieval quality, prompt orchestration & security.
- Experience or familiarity with deploying chatbots/agentic workflows in production environments.
- Ability to work with AI-related code (Python, JavaScript/TypeScript, Bash, SQL, JSON/YAML, PowerShell).
- **This role requires a mandatory minimum commitment of six (6) months. Applications from candidates who are unable or unwilling to fulfil this requirement will not be considered.**
